SUMMARY

I'm a passionate Junior Software Developer with diverse tech expertise in Typescript, TailwindCSS, Vue.js, Supabase, React, and more. Eager to innovate and collaborate with teams that value both people and exceptional products.

EXPERIENCE

Frontend Developer

Consilient   **June 2022 - November 2022, US, D.C., Washington**

· Created client facing webpages from scratch using HTML/CSS, Typescript, TailwindCSS, Next.js, and React. This included building a design system for the application to be used across all brand verticals.
· Collaborated with Product Design and Lead Software Developer via tools such as GitPod by reviewing the project backlog and reviewing the feature design, so that the development and the design kept in sync.
· Developed industry-leading website performance and stability, increasing website load time by 32% and decreasing downtime from 18 hours to 12 minutes based on tech tooling.

Automation Engineer Intern

Launchgood   **June 2022 - September 2022, Michigan**

· Tested crowdfunding website to find bugs that impacted customer flow for 1.1M Worldwide customers in 153 countries.
· Created test documentation to ensure proper coverage prior to future code migration impacting over 1000+ campaigns at any given time.
· Increased launch success rate by 10% by easing customer flow and removing bugs that slowed down donations.

Software Quality Engineer Intern

Breakthrough Fuel   **November 2021 - March 2022, US, WI, Green Bay**

· Maintained test suites for FELIX, a data-driven UI crucial to everyday core business with a 96% code coverage increase, a 99% test case pass rate, and a 10% reduction in regression testing time.
· Solely implemented data pull testing and monitored results for a system that processes 21M+ shipments for clients such as Target and Kelloggs.
· Developed automated test processes and ensured quality of delivered software met satisfaction through manual and exploratory testing.

Software Developer

Zero Grocery   **May 2021 - December 2021, US, CA, Fresno**

· Enhanced the website's user experience through the implementation of visually appealing splash pages using Next.js, TypeScript, and React, in alignment with Figma designs.
· Displayed exceptional problem-solving skills by executing efficient smoke tests, identifying and prioritizing failures, and promptly resolving coding and product issues, ensuring the successful and timely release of new versions.
· Demonstrated versatility as a valued team member, fulfilling dual responsibilities as both the QA Tester and Frontend Developer within a collaborative team of 7 developers. Effectively coordinated with cross-functional teams, including Product, Marketing, Design, and Software, to deliver seamless project outcomes.
· Maintained code integrity and facilitated smooth deployment by actively contributing code to GitHub, conducting thorough code reviews, and ensuring code readiness for deployment.

EDUCATION

Bachelor of Political Science

Northeastern Illinois University · Chicago, IL
· Attended

SKILLS

Typescript, TailwindCSS, Next.js, Vite, Wunderbase, Supabase, React, Git, npm, Vercel, Heroku, Vue
