SUMMARY

Junior Software Engineer with a love for building code for humans. Hands on experience in integration, build systems, root-cause analysis, and best practices for CI/CD.

EXPERIENCE

Software Integration Engineer CE

Apple **July 2026 - Present, San Diego**

- Supported software submission workflows and git branch management across multiple engineering teams, gaining hands-on experience with continuous integration (CI) practices.
- Wrote and maintained internal tools using Python and Swift, contributing to engineering workflow improvements.
- Worked cross-functionally with engineering teams to help identify and resolve build issues.
- Assisted in root-cause analysis of build failures, routing issues to the appropriate engineers to speed up resolution.
- Gained exposure to release processes and quality standards for integrated code in a large-scale production environment.

Specialist

Apple **July 2024 - Present**

Frontend Developer

Consilient **June 2022 - November 2022, US, D.C., Washington**

- Developed responsive, customer facing web applications using React, Next.js, TypeScript, TailwindCSS, and HTML/CSS.
- Built a scalable design system adopted across brand verticals to improve UI consistency and development efficiency.
- Partnered with Product & Engineering teams in Agile workflows, supporting manual and new automation testing flows and documentation.
- Optimized performance, achieving a 32% faster load time and reducing downtime from 18 hours to 12 minutes.
- Contributed to Git-based development workflows to support stable releases and deployment readiness.

Automation Engineer Intern

Launchgood **June 2022 - September 2022, Michigan**

- Ran testing and code fixes to improve customer flow for 1.1M+ users across 153 countries.
- Identified, documented, and validated critical defects to streamline resolution and improve QA processes.
- Performed regression and functional validation testing to ensure release quality.
- Analyzed user behavior and product flows, contributing to a 10% increase in successful campaign launches.
- Collaborated within Agile teams to align automation efforts with development and product goals.

Software Quality Engineer Intern

Breakthrough Fuel **November 2021 - March 2022, US, WI, Green Bay**

- Maintained and optimized automated test suites for FELIX, increasing code coverage to 96% for FELIX's AI flow.
- Executed manual and regression testing to identify high-impact defects prior to release.
- Reduced regression testing time by 10% through improved test efficiency.
- Supported enterprise-grade reliability standards through structured defect tracking and validation.

Software Developer

Zero Grocery **May 2021 - December 2021, US, CA, Fresno**

- Developed and optimized frontend components using Next.js, React, and TypeScript.
- Improved page performance through efficient state management and reusable UI components.
- Conducted smoke testing and debugging to improve deployment reliability.
- Collaborated with cross-functional teams to deliver tested, user-focused features.
- Contributed to GitHub workflows and code reviews to maintain clean, scalable code standards.

SKILLS

Typescript, TailwindCSS, Next.js, Vite, Wunderbase, Supabase, React, Git, npm, Vue.js, Postman, CI/CD
